

Switch it off!

GSTAAD[®]
COME UP  SLOW DOWN

ENERGY
IS PRECIOUS.
LET'S NOT WASTE IT.
**DO YOUR
PART!**

Do your part!

Dear residents and guests,

Resources are limited in recent times – especially in the energy sector. Supplies are under strain in Switzerland, too, not just our neighbouring countries. To help us get through the winter, it's important that we don't waste any valuable energy.

You too can play your part and help control your energy consumption.

Together, a lot of little things can make a big difference.

Until the last weekend before Christmas, and from the end of New Year week, avoid switching on certain lights.

WHAT CAN YOU DO?

Only leave these on from Saturday 17 December 2022
to Sunday 8 January 2023:

- Christmas lights
- Under-roof, gable and building lights
- Window display lights

... from dusk to midnight

More energy-saving tips:
www.be.ch/energiemangel

The current situation brings new challenges to us all. Thank you for doing your part.

We truly believe: together, we can make a difference.
